Sustainability Specialist  
Neste

# Driven by our purpose

An aerial photograph of a city skyline with several tall skyscrapers. Overlaid on the image are four white circles, each containing a key performance indicator in blue text. The circles are arranged horizontally across the middle of the image.

**WE ARE  
NEARLY  
5,500**  
dedicated  
professionals  
committed to  
our purpose

**OUR  
CUSTOMERS**  
reduced their  
GHG emissions  
by 7.9 million tons  
with our renewable  
products

We have been  
selected as the  
world's  
**3RD MOST  
SUSTAINABLE  
COMPANY**

**WE REACHED  
1,422 M€**  
comparable  
operating profit of  
which  
69% came from our  
renewables

\*Figures at the end of year 2018.

# Our way of doing sustainable business

## People

- Human rights
- Incident-free operation and safety of our people and society
- Fair and equal employment
- Good corporate citizenship and ethics

## Climate

- Low-carbon solutions: renewable fuels and renewable polymers & chemicals

## Environment

- Sustainability of raw materials
- Resource efficiency
- Protecting biodiversity and preventing deforestation

Global 100:

**Neste is the 3rd most sustainable  
company in the world.**

Global 100:  
Neste is  
the world's

**3rd**

most  
sustainable  
company.

# From low quality raw materials to high quality products

We are the world's number

**1**

renewable diesel provider with the capacity of 2.9 million tons

The share of waste and residues is over

**80%**

of our renewable raw materials

Neste MY Renewable Diesel reduced GHG emissions by the amount equaling the annual carbon footprint of

**1.2**

million EU citizens

# Renewables Platform

**PRODUCTION  
CAPACITY:**

**2.9**

million tons  
annually

**Production capacity  
growth**

Our renewable raw material  
portfolio consists of over

**10**

different globally sourced  
waste and residue raw  
materials

Waste and residues  
account for

**83%**

of our total raw material usage  
to produce renewable products

"The Singapore expansion increases our total production capacity close to 4.5 million tons in 2022. We continue supporting our customers' growing demand for renewable products by expanding capacity and feedstock platform beyond the Singapore investment."

**MATTI LEHMUS**  
Executive Vice President  
RENEWABLES PLATFORM

# Sustainability of renewable raw materials

# Renewable raw materials

Neste's renewable raw material portfolio consists of over 10 different waste and residue oils and fats and vegetable oils

Waste and residues account for approximately 80% of Neste's renewable raw material use annually

All renewable raw materials Neste uses are sustainably produced\* and traceable to the place of origin

Products have consistent high quality independent of raw material used

\*Meeting or exceeding e.g. EU RED requirements

We accept only sustainably-produced renewable raw materials from suppliers who

- meet our strict criteria and
- fully comply with the industry-specific regulatory requirements in our key markets.

# All renewable raw materials sustainably produced

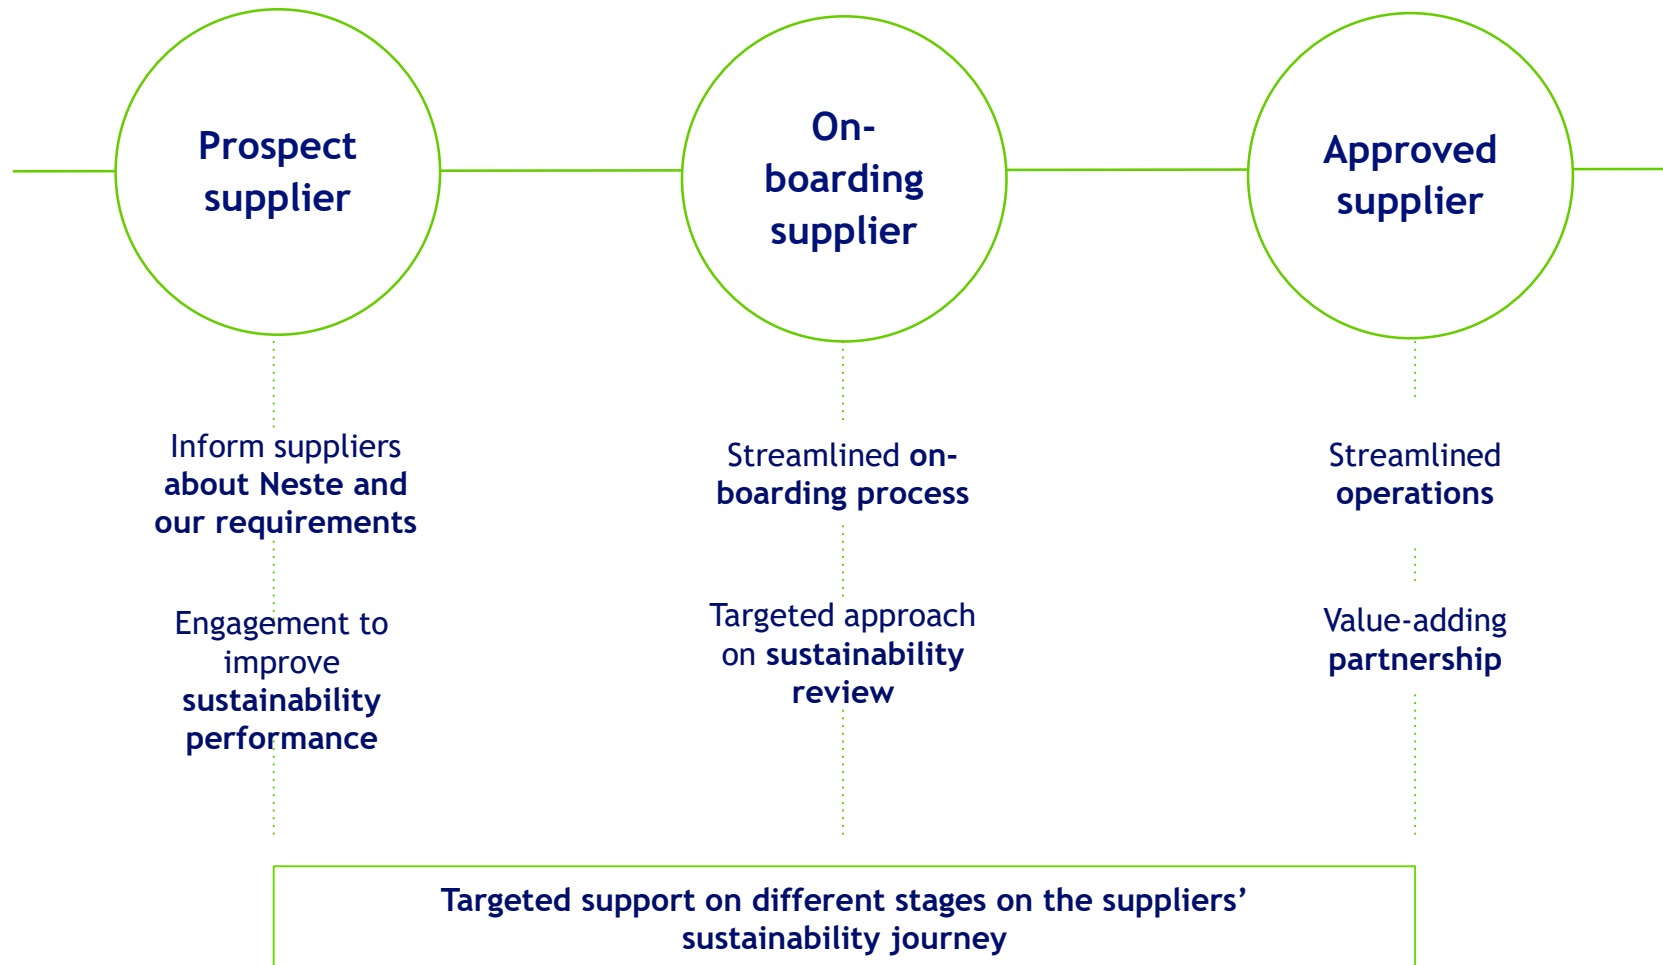

We source our renewable raw materials only from known sources; traceable back to their cultivation sites or production plants.

Traceability provides us with visibility into the raw material supply chain; enables efficient monitoring and engagement.

Traceability helps us ensure that raw material production does not infringe human rights or put forests or carbon-rich areas at risk.

# How to become Neste's Supplier

# Suppliers Documents Check

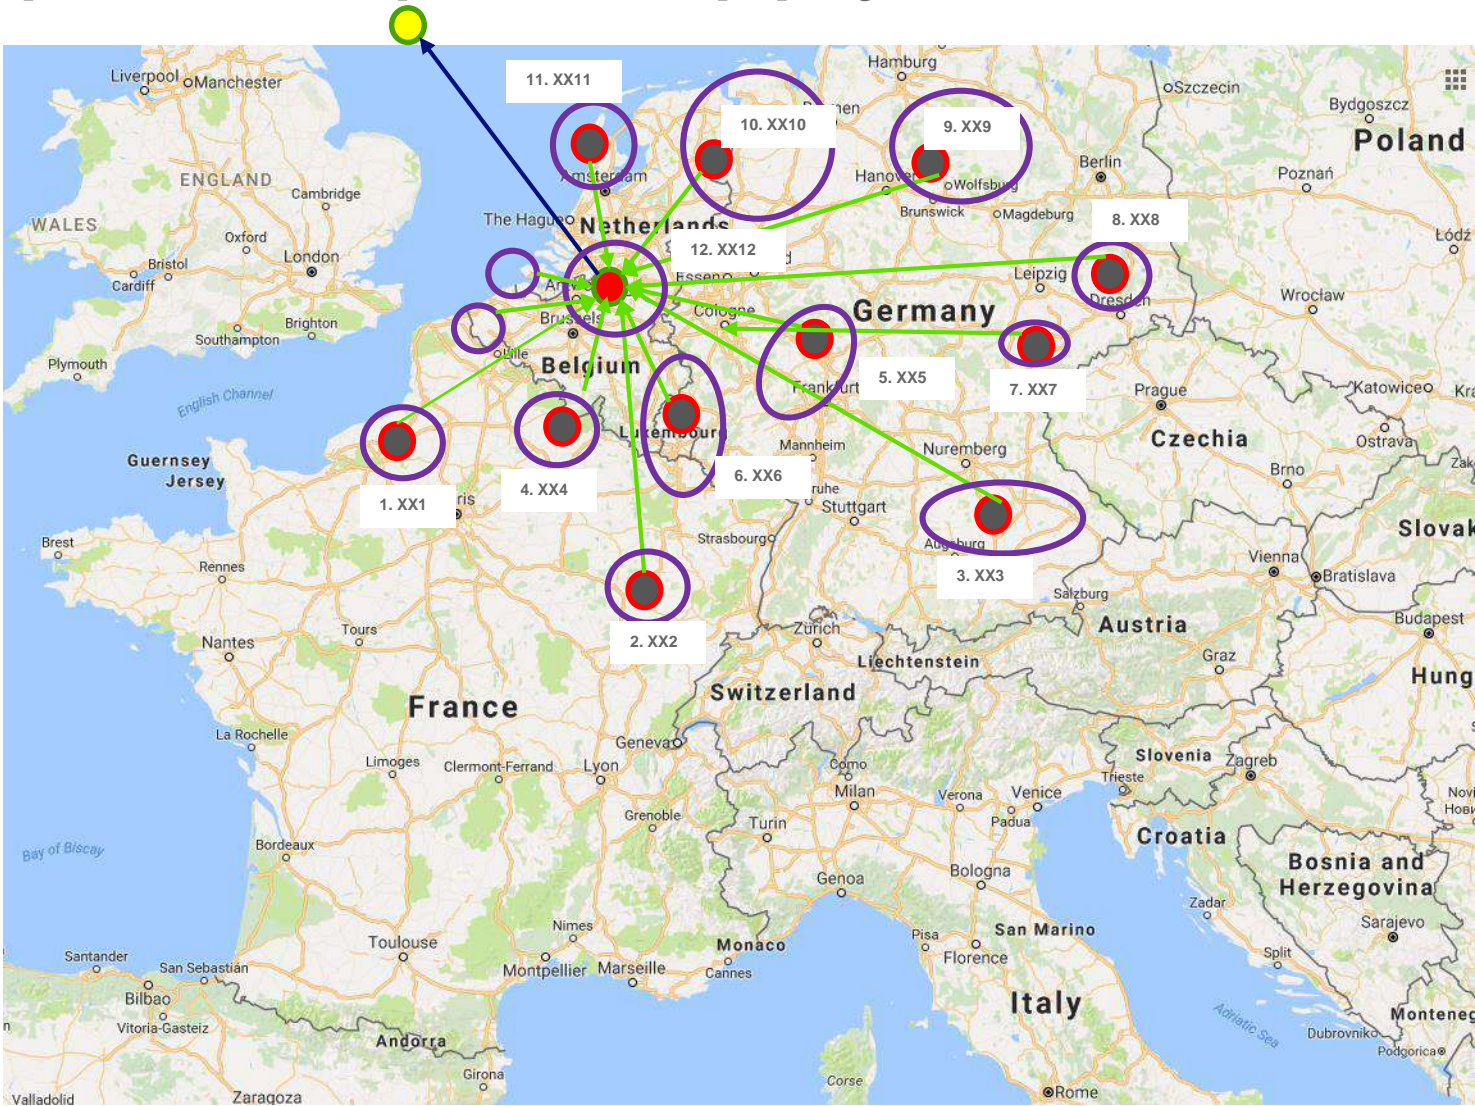

- Business license / permit
  - Scope of business activity, facility, products/ materials
  - Geographical areas of business activities
  - Background check on the supply chain
- Environmental & OHS permits
  - Supply chains – e.g. collection points, processing units.
- Human resources policies
  - Provisions for employees – minimum wages, insurance, medical benefits, overtime pay
  - Safe working environment, provide PPE, etc.

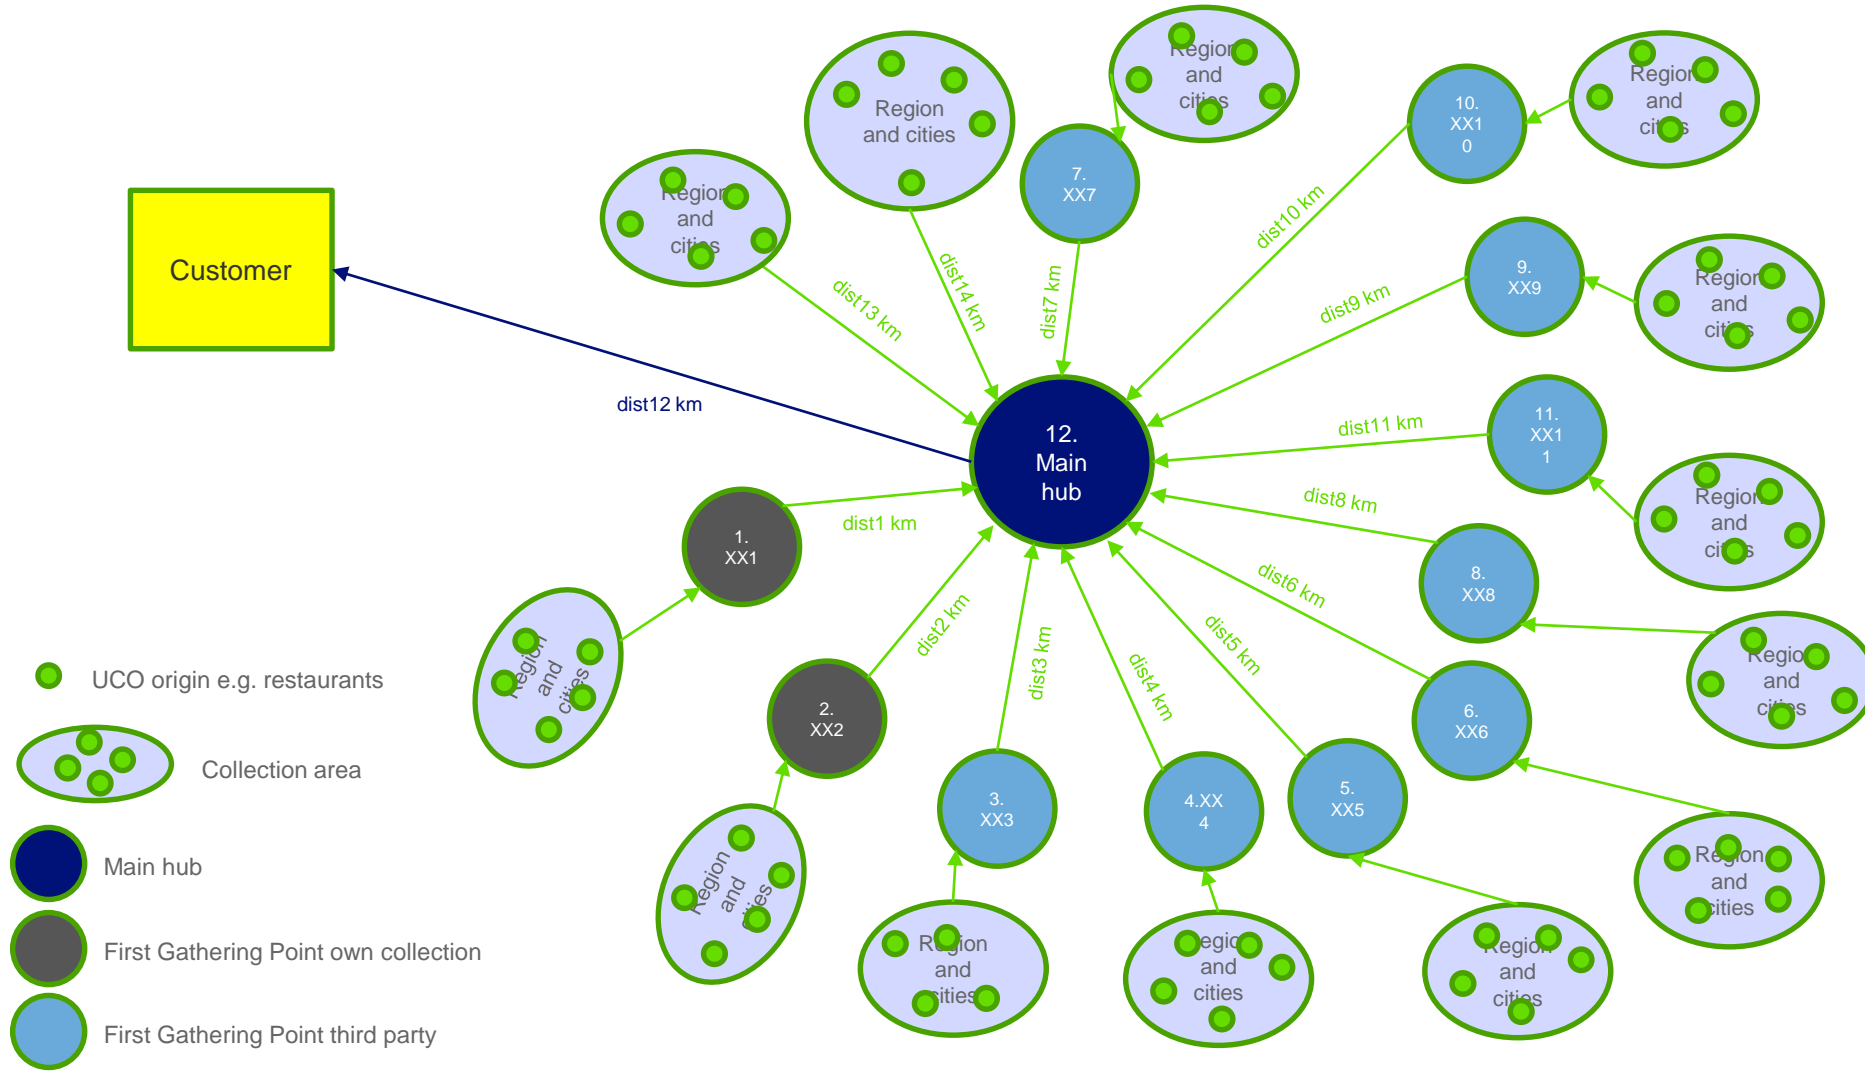

# Geographic map of supply chain

**LEGEND :**

- Collection area
- Warehouse
- Main hub: Filtering, cleaning and storage
- Customer

# Schematic diagram of Supply chain

# Listing of Supply chain

Number	Name	Address	City	Country	Collection area	Volume (mt/month)	Type of sources (restaurants, food processing, etc)	Office (Y/N)	Warehouse, Storage (if yes storage in mt)	Treatment (Y/N, if Y what type)	Transport to main hub/customer	Transport (own, external)	Distance (km)

# Traceability – Delivery Forms

**Delivery Form, Seller and Cargo details**

**NESTE**  
 Animal Fat / Fish Oil / Tall Oil Pitch / Technical Corn Oil / Used Cooking Oil (single sources) / Fatty Acid Residue / Yellow Grease  
 Biofuels Carbon, Traceability and Sustainability Statement Information

Please note that this delivery form is invalid without all three parts  
 Land related sustainability criteria according to Art. 17(3), (4) and (5) RED were not taken into account.

**General Guidance**  
 This delivery form must be delivered alongside (with the BIL form) or before the delivery of the physical oil by the relevant ship. The timing of the submission of this form is based on the contract signed by both parties. Seller needs to sign the form to ensure that all the information completed is correct. This form is designed to summarize the detailed traceability documents that are normally stored and available in the corresponding processing/production units belonging to the producer and seller. Neste will not ask for these detailed documents to come with this form (unless there is a separate agreement), however these documents should be stored by the seller or producer as agreed in the contract (if not specified, 5 years). For more information on the form please contact Neste Bio-compliance team ([bio-compliance@neste.com](mailto:bio-compliance@neste.com)). Please bear in mind that this form might change based on regulatory, certification or Neste

**A1. Seller Details.** Please provide here your own details

Seller company name \_\_\_\_\_  
 Seller company address \_\_\_\_\_  
 Contact person name \_\_\_\_\_  
 Contact person telephone \_\_\_\_\_  
 Contract reference number \_\_\_\_\_  
 Buyer reference \_\_\_\_\_  
 Seller reference \_\_\_\_\_

**A2. Seller's Certificate Details (if applicable)**  
 Please provide here your own certificate details. Note that these details are **mandatory** if the product is certified by a voluntary scheme  
 system \_\_\_\_\_  
 Certificate number of the seller \_\_\_\_\_  
 Name of the certification body \_\_\_\_\_  
 Date of certificate issued \_\_\_\_\_

**B1. Cargo details**

Vessel/Barge name \_\_\_\_\_  
 BIL date (dd/mm/yyyy) \_\_\_\_\_  
 A unique delivery number \_\_\_\_\_  
 Loading port \_\_\_\_\_  
 Discharge port \_\_\_\_\_

Loaded quantity \_\_\_\_\_  
 In metric tons in air  
 In metric tons in vacuum

Feedstock type  
 Please note that you can select only one feedstock type per delivery form

Animal Fat (The material is eligible for markets that are accepting animal fat as a waste/residue)  
 Used Cooking Oil entirely or partly of animal origin  
 Used Cooking Oil entirely of vegetable origin  
 Technical Corn Oil  
 Fish Oil  
 Tall Oil Pitch  
 Fatty Acid Residue  
 Yellow Grease

Quantity (mt) \_\_\_\_\_  
 Quantity (mt) \_\_\_\_\_

**Market Compliance information.** Tick the appropriate boxes (Market compliance coverage is based on the contract signed by both parties)

EU RED compliant  EPA RFS compliant

I hereby state that the information I have filled in this form is true and corresponds to the actual documentation being stored in our company. I understand that the supporting documents for this form should be stored in accordance to the agreed contract terms.

**Delivery form, Traceability / Origin of the Product**

**NESTE**  
 Animal Fat / Fish Oil / Tall Oil Pitch / Technical Corn Oil / Used Cooking Oil (single sources) / Fatty Acid Residue / Yellow Grease  
 Biofuels Carbon, Traceability and Sustainability Statement Information

Traceability information should be filled in based on the diagram below. Arrows between boxes represent transportation which is reported in Section C1 and C2 (Transportation distance).

```

    graph LR
    C1[C1 Point of origin  
(e.g. rendering, ethanol, food manufacturing or fish  
fillet plant, vegetables or crude oil refinery)] --> C1_2[C1 / C2  
Warehouse or other  
processing unit  
(e.g. storage tank before  
transportation to the port, cleaning  
or filtering facility)]
    C1_2 --> C2[C2 / C2  
Secondary warehouse (e.g.  
storage tanks or port) or  
other processing unit]
    C2 --> N[ Neste ownership of the material ]
    
```

**C1. For primary processing unit. Please duplicate rows where necessary**

Name of the point of origin	Certificate number covering the point of origin	Location of the point of origin (city, country)	Loaded quantity (mt)	Date of loading	Category of the animal fat (1,2,3), choose one if applicable	Name of the warehouse	Certificate number of the warehouse	Location of the warehouse before shipment (city, country)	Transportation distance (km)				Batch number
									Truck	Vessel	Train	Pipeline	

**C2. For secondary processing unit / warehouse (if applicable). Please duplicate rows where necessary**

Name of the secondary warehouse or other processing unit	Certificate number of the secondary warehouse or other processing unit	Location of secondary warehouse or other processing unit (city, country)	Loaded quantity (mt)	Date of loading	Category of the animal fat (1,2,3), choose one if applicable	Name of the warehouse	Certificate number of the warehouse	Location of the warehouse before shipment (city, country)	Transportation distance (km)				Batch number
									Truck	Vessel	Train	Pipeline

What's a Supply Chain Template?

A supply chain template records a commonly used supply chain information per physical delivery. Supply chain represents a full traceability of the feedstock from the **loading node** (location prior Neste delivery) to its **origin node** (location where the feedstock originated)... [Read More](#)

An aerial photograph of a long suspension bridge stretching across a vast blue ocean under a clear blue sky with a few wispy clouds. The bridge has two tall towers and spans the entire width of the image. Several cars are visible on the bridge's surface.

## Our promise:

We will help our customers reduce their greenhouse gas emissions by at least 20 million tons every year by 2030.

## Our promise:

We will reduce carbon footprint in production ahead of EU's climate and energy targets.
